

# BaitPlate<sup>TM</sup>

## station

### **Sturdy, Economical Station for Baiting Ants, Cockroaches and Other Insects**

- Holds gel, granule and liquid baits
- Adjustable for large and small insects
- Dual bait compartments, ramped entry
- Convenient low-profile, clear design
- Mounts flat, vertically, even upside down
- Refillable or disposable
- Comes with sticky back, or mounting hole for extra security
- Fits inside the D-Sect IPM Station for ultimate tamper-resistance

**Product Code: BPCL048 - box of 48  
with service labels**

**Usage:** Lift open the lock tab for filling. Lock the tab back down for ants and German roaches, or remove at the perforation for larger insects. Secure using the sticky dot or put a tack through the mounting hole. A tack may be better for extra security when using liquid bait, due to greater weight of the filled station. To create a beetle trap, fill the station with InVite Multi-Lure Oil. Beetles will enter the station and get trapped in the oil.
