

# 40"x 22" Collapsible Pigeon Trap

The SW4022KDS trap collapses down to 1" high for convenient storage or transport. Trap has 4 one-way doors, a hinged shade screen and simple clips that hold the trap together. Holds up to 18 birds at one time. A spring and latch fastened top mounted door allows for quick bird removal. An optional Water and Food Station is available for the SW4022KD/S.

## Item# SW4022KDS - Collapsible Pigeon Trap w/ hinged Shade Screen

Pre-bait the problem area for several days. Once birds are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the one way door so birds can move freely in and out of the trap as they eat. Apply bait in a trail that starts outside of the trap, leads in through the doors and ends with the bulk of the bait in the middle of the trap.

After acclimating to the trap, untie the door and capture the pigeons. Make sure to inspect the trap every day. Remove the pigeons by using the top access door.

Provide food and water in the trap. Partially cover the trap to create shelter from the elements. Do not leave birds in the trap for long periods of time.

## Optional Food & Water Station - Item# SWWF12

Optional Food & Water Station kit for the collapsible SW4022KDS pigeon trap. Unique design with easy installation. Easy to fill water and food through top access door of trap.

**IMPORTANT NOTE:** Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science. Nixalite of America Inc guarantees the workmanship of the bird traps. WE DO NOT guarantee that you will catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
