

BDS™ is a passive detection device designed for monitoring bedbugs on a large scale - as part of a proactive inspection/prevention strategy.

BDS™ should be used just about anywhere:

- Multiple-Unit Dwellings/
Apartment Complexes
- Hotel/lodging locations
- Long-term Care
Facilities/Hospitals
- Offices
- College Dormitories
- Schools/Daycare Facilities
- Restaurants
- Public Transportation
- Storage Facilities

Anywhere people inhabit or frequent.
