Demon Max Performance

Demon Max has been trusted for years because it delivers consistent performance.

- Fast-acting
- Excellent mixing qualities; no sedimentation
- Low vapor pressure to prevent evaporation
- Labeled for termite treatment; for pre- and post-construction control of termites, including Subterranean and Formosan termites

Directions for Use

Demon Max can be used for:

- Treatment to soil or vegetation around structures
- Applications to lawns, turf and other vegetation
- Applications to building foundations up to a maximum height of three feet
- Pre and post construction termite treatments to establish a sub-surface barrier
- Indoor spot or crack-and-crevice treatments
- Outdoor spot or crack-and-crevice treatments

When using Demon Max:

- Do not water treated area to the point of run-off
- Do not make applications during rain
- Do not apply directly to sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur, except as directed by the product label

Environmental Profile

- Designed specifically for use under and around structures
- Demon Max binds to soil and organic matter, lessening the likelihood it will be washed away from its desired application area and into water sources
- **Environmental advisory:** Applying this product in calm weather when rain is not predicted for the next 24 hours will help ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run-off to water bodies or drainage systems

Why Choose Demon Max?

- Broad-spectrum control of more than 30 pests
- Dependable results
- Versatile use for both general pest and termite control
- Indoor and outdoor control options
- Cost-effective perimeter product
