

# E-Z-Sorb

*"Eliminates  
Problems"*

Bio-Degradable

## DIRECTIONS FOR USE

**Sprinkle E-Z Sorb flakes on water-based chemical spills. Spread the flakes from the outside edge of the spill toward the center. Watch as the flakes immediately absorb the spill and form a gel. The gel can then be removed with a dustpan or shovel and a broom. Toxic substances should then be disposed of according to EPA guidelines. Gel containing Termiticide may be disposed of by placing the substance directly into a trench next to the building foundation and covered with untreated soil. After removing the gel, clean contaminated surface with a detergent.**

**Available in 2.5 pound and 8oz. jars.**

**A 2.5 Pound Jar Will Absorb Approximately 55 Gallons of Spill  
Net Wt. 2 ½ LBS**

**E-Z Sorb is TOTALLY BIODEGRADABLE AND NON - TOXIC**
