

Introducing a new Reduced Risk* indoor/outdoor ant gel bait that's attractive even to picky ants.

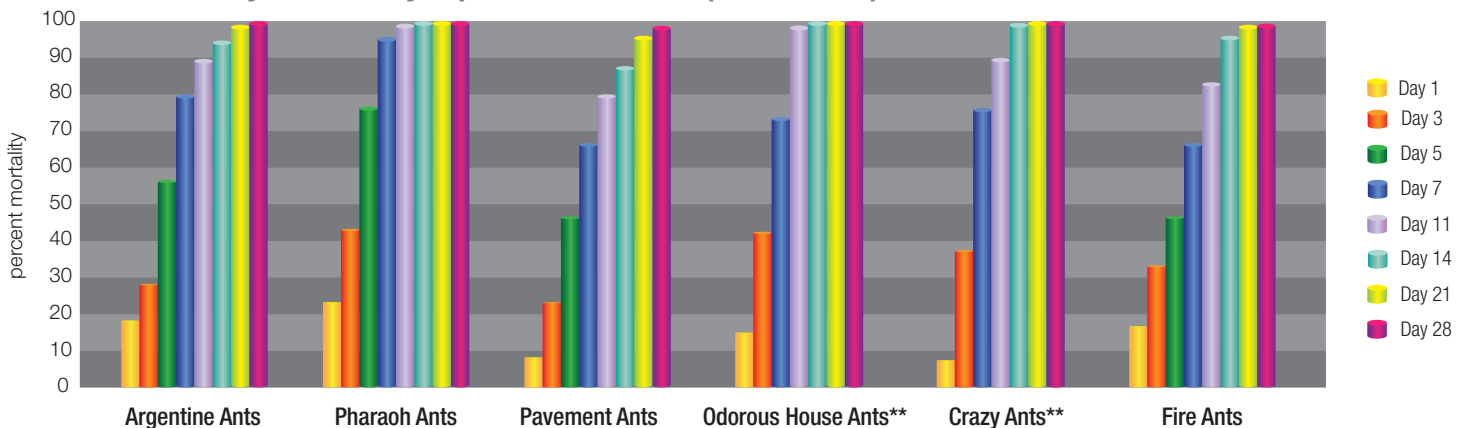

New **Alpine** Ant Gel Bait features the Reduced Risk* active ingredient dinotefuran and a formulation free from the Big 8 Allergens. That makes it a smart choice for use with today's health and environmentally conscious customers. It is also attractive even to picky ants and works great with the products in BASF's SmartSolution for Ants. And that makes it a smart choice for your SmartSolution-based ant program.

*Dinotefuran, the nonrepellent active ingredient in **Alpine** Insecticides, has been granted Reduced Risk status for public health use by the EPA.

Here are a few of the features that make **Alpine** Ant Gel Bait so flexible and effective:

- Works great with **Termidor**® termiticide/insecticide, **Phantom**® termiticide-insecticide, and Prescription Treatment® brand **Phantom**® Pressurized Insecticide
- Low toxicity with low percent of active ingredient
- Gel formulation stays moist
- Can be used indoors and outdoors
- Labeled for use in food-handling areas

Ant Mortality Caused by Alpine Ant Gel Bait (choice test)

Date: 2008 and 2009, Dr. Jerry Cook, Sam Houston State University, Department of Biological Sciences, Huntsville, TX 77341. Report number: 1245.

**Data not collected on Day 5

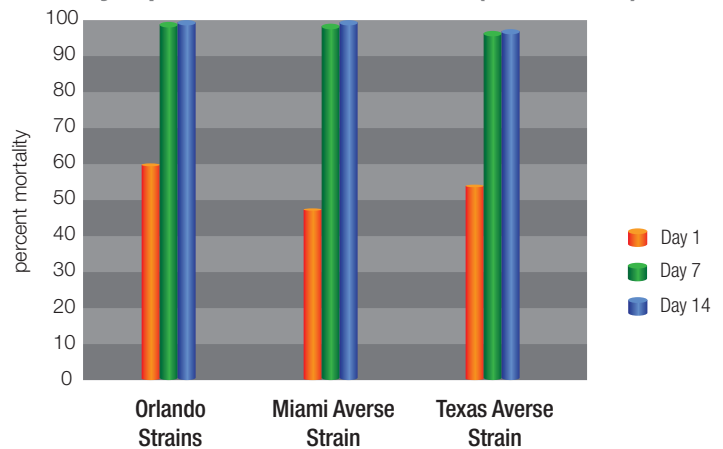

Introducing a powerful new Reduced Risk* cockroach gel bait with none of the Big 8 Allergens.

Alpine Cockroach Gel Bait makes it easier than ever to show your customers you're controlling their roach problems and minimizing their health and allergy risk. With the Reduced Risk* active ingredient dinotefuran and a formulation free from the Big 8 Allergens, it's a smart choice for today's health and environmentally conscious customers.

Here are a few of the features that make **Alpine** Cockroach Gel Bait such a flexible and effective addition to your cockroach control arsenal:

- Works great with **Phantom**® termiticide-insecticide and Prescription Treatment® brand **Phantom**® Pressurized Insecticide
- Starts killing roaches within hours
- Attractive to bait-averse cockroaches
- Labeled for use in food-handling areas
- Available in reservoir or piston can
