

Contains Microbes and Citrus Oil

InVadeTM

bio drain

Drain Treatment Gel • 32 Applications

Directions for Use

InVade Bio Drain contains microbes that eliminate odors and eat through scum where flies can breed, and citrus oil for extra power. Moisten drain with warm water (1-2 gal) before treatment if not used regularly and apply at low drain usage times of the day. Apply 4 oz to each drain around the edges to coat the sides. Reapply every other day for first week and then weekly for ongoing maintenance. For drains that have a very heavy layer of scum, carefully (drain scum can contain pathogenic bacteria) clean the drain manually for more immediate results and then maintain with InVade Bio Drain to prevent further build-up. InVade Bio Drain can also be used to treat 'sugar snake' in soda fountain drip trays. Apply about 1 oz to each drain weekly. For mopping applications, apply 4 oz per standard mop bucket. For other surface cleaning, such as dumpsters, trash chutes and urinals, use 4-8 oz per gallon of water and apply with a sprayer. To foam the product, place 4-8 oz in a gallon of water and add 2-4 oz of foaming agent and apply using a foamer. To power spray, use 4-6 oz in a hose-end sprayer. A pesticide may be added to the diluted product for spraying or foaming applications, and the pesticide label must then be followed.

CAUTION: Keep out of reach of children. May be harmful if swallowed - seek medical attention and do not induce vomiting. Avoid contact with skin and eyes. If in eyes, remove contacts and flush with water for 15 minutes. Seek medical attention for persistent irritation. Store in a closed, appropriately labeled container between 40 and 90 °F.
