- Safe For Children and Pets When Used as Directed
 - Long Lasting Formula
- Helps Replenish Depleted Lawns

NET WT. 30 LBS. (13.6 KG)

Lawn Food

8-0-4

WITH 2% HUMIC ACID

A NATURAL CHOICE FOR YOUR LAWN

Put Nature to work in your yard with Natural Guard Lawn Food 8-0-4 with 2% Humic Acid.

DIRECTIONS FOR USE

Natural Guard Lawn Food 8-0-4 With 2% Humic Acid is especially formulated for all types of cool and warm season grasses including Kentucky Bluegrass, Perennial Ryegrass, St. Augustine grass, Bermuda grass, Centipede grass, Bahia grass, and Tall Fescue. It is manufactured in a homogenous granule that penetrates easily through the turf grass canopy. It is derived from both rapid and slowly available organic nutrient sources. It is clean, green, and easy to apply.

DIRECTIONS: Apply the fertilizer granules with a calibrated spreader in the Spring, Summer, and Fall. Apply at a rate of 12 lbs. per 1,000 sq. ft. of lawn area. Irrigate treated area with 0.25 inches of water after application. Maximum number of applications is 4 per year.

APPLICATION INSTRUCTIONS : This product may be applied with drop or rotary-type spreaders designed to apply granular fertilizers. For best results, apply this product evenly and uniformly avoiding streaking, skips or overlaps. Check equipment frequently to verify calibration and proper functioning.

SPREADER SETTINGS

This product can be applied with a drop or broadcast (rotary) spreader. For best results, apply this product evenly and uniformly over the treated area avoiding streaking, skips or overlaps.

Before each application, determine the correct amount (lbs.) of product to place in the spreader hopper for the area to be treated. For example, if the label states to apply 12 lbs. per 1,000 sq. ft. and your area to treat is 2,000 sq. ft. then place 24 lbs. of product in the hopper and set the spreader setting at 11 (per table below) if using an Accugreen drop spreader.

A more uniform application can be made by spreading one-half of the recommended amount of this product over the turfgrass area and then applying the remaining one-half of this product at a right angle to the previous application.

NOTE: The spreader settings listed below are approximate. The speed at which you walk and the working condition of the spreader will affect the rate of application.

Spreader	Spreader Settings
	Lbs of product per 1,000 sq. ft.
	12 lbs.
Scotts/Republic Accugreen (Drop)	11
Scotts/Republic Speedy Green (Broadcast)	12
Ferti-lome/Earthway Ev-N-Spred (Broadcast)	23

NOTE: This product is made with feed grade ingredients. Persons allergic to any of the listed ingredients should not handle this product. Read entire label carefully and use according to directions.

STORAGE: This product is indefinitely stable in cool, dry storage conditions. Store unused fertilizer in the bag and seal tightly. Store out of reach of children and pets.

Not for use in organic crop and food production in California.
