NET WEIGHT 2.75 LBS. (1.25 KG)

Blood Meal

KEEP OUT OF REACH OF CHILDREN

Natural Guard® Blood Meal is for roses, flowers (such as pansies, violets, caladium, etc.), trees, shrubs and other plants where luxuriant top growth and deep green foliage is desired.

DIRECTIONS FOR USE

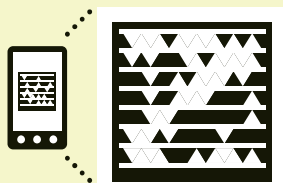

Apply **Natural Guard® Blood Meal** once every two months during the growing season.

Flowers and Bed Plantings: Use at rate of 2 lbs. per 100 sq. ft. (10' x 10') of planting area. For row planting, apply 2 lbs. per 100 ft. row of plants and scatter over six inches on either side of the row. Sprinkle lightly over area and water in after application.

Pansies can be helped to bloom larger and more profusely by using **Natural Guard® Blood Meal** at the rate of 1 lb. to 25 pansy plants. Violets will respond with unusually long stems; apply as for pansies. For large colorful leaf growth on caladiums, apply 1 lb. to 5 large or 10 small plants. Sprinkle lightly on soil around plants and water well.

Individual Plants or Shrubs: Apply at the rate of ¼ cup per 9 sq. ft. (3' x 3') of plant area. Broadcast evenly under the branches, scratch lightly into soil and water in after application.

NOTE: Wash off any fertilizer that may come in contact with leaves and flowers.
