Introducing the Termatrac®T3i

Introducing the one and only Termatrac®T3i - the only device that detects, confirms and tracks the presence of termites.

- The Termatrac®T3i is the most advanced termite detection device in the world.
 - With patented radar detection, a remote thermal sensor plus a pinpoint accurate moisture sensor, the 3-in-1 device is the ultimate tool for the professional pest management technician.
 - It detects, confirms and tracks the presence of termites through an ingenious combination of cutting edge radar technology, backed by thermal and moisture sensors.
 - An easy to use tool that assists you in getting the job done confidently.
 - The T3i also lets you capture site data for on or off site analysis.
 - The use of fewer chemicals results in a positive environmental benefit.
 - It removes the fear of failing to identify the presence of termites.
- Just like the termites themselves, if your competitors attempt to quote against you without a Termatrac®T3i, they don't stand a chance.

What our customers say

“ The Termatrac® is a tool that allows us to have real confidence in our ability to ensure that we have done our job of eliminating drywood termite colonies. This confidence comes through in our communication with the customer and in the guarantees that we are able to offer. ”

Eric Paysen Ph.D.
Technical Director,
Lloyd Pest Control
(San Diego, California)

“ The Termatrac® allows us to show the customer exactly where the termite activity is in their wall. After a treatment is performed, we can go back to our customer and confirm using the Termatrac® that there is no more activity. This gives us confidence in our work, as well as peace of mind to our customers. ”

Matt Breda,
Breda Pest Management
(Loganville, Georgia)

“ Termatrac® is science...it is the cutting edge of technology! It has depth...it's been researched... it's been in the market a decade and now further advanced. It is now a 3-in-1 tool - radar, thermal, moisture...plus it has reports. Termatrac® has the WOW factor!

When you walk up to the front door...the customers see that this guy is SERIOUS... Termatrac® gives you confidence, knowing whether termites are there and to check that your treatment is working. ”

Simon Dixon, Exopest
(Melbourne, Australia)
Australian Pest Controller
of the Year 2010

“ If you want to be a professional you've got to have one of these tools, it's a modern piece of equipment which makes your inspections almost worry free, removes the guess work and what if's...giving you more confidence. It enhances your expertise and I wouldn't leave home without it. ”

Max Ackland,
Ackland Pest
& Weed Control
(Victoria, Australia)

The T3i at a glance

The ultimate 3-in-1 tool with reporting that the professionals use

Radar

The unique termite detection radar does what no other detector has ever been able to do. It sends out radar through most common wall materials that locates and tracks the presence of termites, without the need for tapping or drilling holes in the walls for easy and accurate treatment.

Moisture

The moisture sensor confirms that conditions need further investigation. The moisture component enables the professional pest control technician to easily identify areas of excess moisture as a possible risk area for termites. The moisture sensor is so sensitive it can even pinpoint rising damp.

Thermal

The remote thermal sensor with built-in laser pointer shows changes in surface temperature; a common sign of termite infestation.

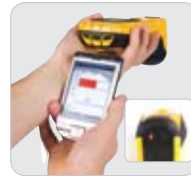

Reports

Captures all your data for each site visit, so you can keep a record of all your jobs. Using a Personal Digital Assistant (PDA) with Bluetooth technology, you can record all your data from the T3i. Reports improve record keeping which assists in defending litigation.

Features

- Detects movement in or behind most surfaces
- Can be used to detect termites in hard to reach places
- Reads movement on a PDA up to 20 yards away from the source
- Detects just one termite

- Detects any change in moisture across surfaces
- Auto calibrates to any material
- Any slight increase or decrease in moisture is immediately shown
- Provides additional confidence in locating termites

- Detects changes in surface temperature
- Bar graph display shows clear results
- Exact temperature changes are displayed numerically
- Ability to choose a new reference point

- Comes with a Personal Digital Assistant (PDA) with Bluetooth
- Capture, record and report if there is any termite activity
- Captures raw data to be reviewed later

Benefits

- Highly accurate findings
- No physical penetration of walls
- No tapping or prodding so termites do not retreat
- Allows for precise treatment
- Eliminates the need for post inspection repairs
- More environmentally friendly as less chemicals need to be used

- Accurately compares moisture readings from different surfaces
- Target smaller areas for more accurate results
- Provide results for any level of moisture and a wide range of conditions (heat, humidity etc.)
- No unnecessary warning alarms

- Accurately compares temperatures of different areas indicating termite infestation
- Easy to operate, simple and quick to learn
- Easy to identify temperature changes
- No expertise needed to understand the displayed images

- Captured data can be used for inspection history, site follow up and reports
- Allow the effectiveness of treatments to be quantified
- Ability to review off site
- Reports can be used as a supplement to pest reports

Advantages

- The 3-in-1 replaces the need for other equipment
- The most accurate and effective detector available
- All features are simple and easy to use with pinpoint accuracy
- The most cost effective and best value tool, no better tool on the market

- Less experienced technicians can compete with experienced technicians in detecting termites
- More professional approach; win more quotes and charge more
- Environmentally friendly; reduced chemical usage
- Cost effective; increase your profit margin

- Increases customer confidence
- Confidence in your results

Who we are

Termatrac® designs, manufactures, distributes and services test and measurement instruments for the pest control and building services sectors.

The company was founded in 1990 and patented its first technology in 1997.
Termatrac® products are used in over 22 countries.

Our long term goal is to be in every technician's toolbox.

We develop products that are easy to use, useful on the job, offer value for money and exceed the needs of both our individual and business customers worldwide.
