**COCKROACH FACTS:** The BioCare Cockroach Trap attracts and captures all types of cockroaches with powerful all-natural attractants in extra-large sticky traps. Set traps near warm spots, along walls and by water pipes. Clean areas where cockroaches have been seen and block access holes to reduce new infestations. Long-term use of the BioCare Cockroach trap can reduce troubling infestations without the use of toxic chemicals. No toxic materials are used to kill the cockroaches. Replace trap every 3 months or sooner if full. Do not touch the bait as you could attract insects. Insect images: J. Kalish, Dept. Entomol., Univ. Nebraska-Lincoln.
