ACTIVE INGREDIENT:  
Orthoboric acid 1.0%  
OTHER INGREDIENTS: 99.0%  
TOTAL 100.0%

EPA Reg. No. 56-72  
EPA Est. No. 56-OH-1

**CONTENTS: 12 Fluid Oz.**

**ITEM No.390**

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not contaminate feed or foodstuffs. Place bait in areas inaccessible to children and pets.

Apply bait into the "Feeder Trays". Insects will crawl in to drink the liquid formula. Refill the bait into the feeder trays as it is consumed. Place the trays on the floor, or a flat surface out of reach of children and pets, where insects have been seen, such as under food cabinets, sinks, refrigerator, food storage areas, window sills, attics, garages, basements, storage areas, closets, etc.

Roaches and ants are attracted to and will feed on the liquid formula until they die. The insects will leave after drinking the bait and return to their nest. They will feed both the queen and their young with the bait thereby killing the queen, the young and the entire colony. If the liquid bait has been completely consumed by the insects, refill with fresh JT EATON Presents Dr. Moss's Liquid BAIT SYSTEM. Repeat placement of the bait until satisfactory insect control has been obtained. Do not use sprays or foggers around the feeder trays as they can contaminate the feeder trays and insect feeding may cease. For thorough control fill feeder trays and place them in infested areas.

**NOTICE:** Buyer and user assume all the risk and liability of use, storage and/or handling of this material not in accordance with the terms of this label.
