DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR USE IN Food handling and food preparation areas of restaurants and food processing plants, stores, farms, dairies, barns, kennels, factories, schools, hotels, motels, offices, ships, planes (cargo areas), supermarkets, food warehouses, bottling plants, hospitals, nursing homes, day-care centers, egg and milk handling areas of dairies and chicken houses.

This product contains a highly effective insecticide designed especially **FOR USE IN** automatic metered dispensers. The dispenser activates a 53 mg shot every 15 minutes. Effectiveness of this product will be noticeable within one hour after the Dispenser is activated. Recommended use is for 24 hours; but if less than 24 hour control is required, the Dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Factors such as airflow rate, size of space treated, humidity and room temperature all affect insect activity and control. Therefore, one unit per 6,000 cubic feet of unobstructed space should be considered as an average with adjustments made depending on specific conditions at place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed. Do not use in aircraft cabins. It is suggested that the container be changed once a month.

Authorized for use under USDA Inspection & Grading Programs.
